Q6 During recent cold weather events, when natural gas prices surged and the grid strained to keep the lights on, coal power served as a price shock absorber for consumers, providing a lower cost, reliable electricity fuel source. How much do you support or oppose the administration’s efforts to continue using coal power to lower energy costs for consumer?

Table 13

Q7 Electricity prices have risen 40% since 2020 and are expected to continue to rise as electricity demand growth surges. Utilities are slowing or canceling plans to close coal plants in an effort to meet new electricity demand and lower costs.

How much do you support or oppose keeping coal plants open longer, if it means meeting these growing energy demands and keeping costs lower?

Q7 Electricity prices have risen 40% since 2020 and are expected to continue to rise as electricity demand growth surges. Utilities are slowing or canceling plans to close coal plants in an effort to meet new electricity demand and lower costs.

How much do you support or oppose keeping coal plants open longer, if it means meeting these growing energy demands and keeping costs lower?
